

Name: _____

Sonographer: _____

Relevant clinical history: _____

Insidious onset: Yes / No

Trauma: Yes / No

.....

HIP: RIGHT / LEFT

STRUCTURE	NAD	COMMENTS
<u>ANTERIOR ASPECT</u>		
Iliopsoas tendon & bursa	<input type="checkbox"/>
Labrum	<input type="checkbox"/>
Rectus femoris	<input type="checkbox"/>
Anterior joint capsule	<input type="checkbox"/>

<u>LATERAL ASPECT</u>		
Gluteus minimus	<input type="checkbox"/>
Gluteus medius	<input type="checkbox"/>
Tensor Fascia Lata	<input type="checkbox"/>
Trochanteric Bursa	<input type="checkbox"/>
Sub Glut Min Bursa	<input type="checkbox"/>
Sub Glut Med Bursa	<input type="checkbox"/>

Comments:

Reference:

Anterior facet – located on the anterolateral surface;
 corresponds to the insertion of gluteus minimus

Lateral Facet – located laterally and has an inverted triangular
 shape; corresponds to the insertion of gluteus medius tendon

Superoposterior facet – forms cranial part of the trochanter;
 corresponds to the insertion of the superior portion of gluteus
 medius

Posterior facet – bald spot with no tendinous insertion; covered
 by the greater trochanter
